

Infinity SaaS

A rich Windows App installed on your PC/Laptop with the data securely hosted on the Microsoft Azure Cloud

Work Anywhere - At the Office, Home or Away with minimal equipment required

Hassle Free Updates - Clear and simple client application upgrades automatically presented to you for installation periodically when available

Backups and Data Recovery - Your data is protected, including geographically redundant copies

Security - A high level of security with stricter passwords and inactive session time-outs to protect your data stored in Microsoft's Azure Cloud. Data is secure and transmissions are encrypted

High Adopter Rates - Lower learning curve due to user's familiarity with their own equipment

System Requirements

	Minimum	Recommended
Usage	<i>By running the minimum system requirements, you may experience a slight reduction in speed/performance when carrying out complex searches, sending large mail merges and other resource intensive functions.</i>	
RAM (available)	4GB	6GB +
CPU	 or equivalent	 or equivalent
Screen Resolution	1440 x 900	1920 x 1080 UHD\4K screen resolutions are not supported
	Requirements	Notes
Operating Systems 	Windows 10 Professional	32 and 64 bit versions are supported.
	Windows 8 & 8.1 Professional	32 and 64 bit versions are supported.
	Windows 7	Windows 7 requires Service Pack 1 or higher. All versions supported except Home.
	Windows Vista	Windows Vista requires Service Pack 2 or higher. All versions supported except Basic.
Microsoft Office 	 Office 2016 & 2019	Only 32 bit versions are supported Office must be installed locally on your PC/laptop rather than using Office Online (via a web browser)
Exchange 	 Business Premium	The exchange integration is an integral part of Infinity and to get the most out of the system we recommend having an exchange email account. If you opt for Office 365 please make sure you select a Business Plan which includes hosted exchange emails. Compare the different plans here . Local Exchange (2016) is also supported.
Download Broadband Speed	Minimum of 4 Mbps per initial user + 1 Mbps per additional user e.g. 5 users would need at least 8Mbps	Speeds stated are a guideline to the minimum needed to use the system. If possible faster internet speeds including fibre connections are recommended.
Upload Broadband Speed	Minimum of 0.7 Mbps for the first user + 0.5 Mbps for each additional user. e.g. 5 users would need at least 2.7 Mbps	These minimum requirements can vary dependant on the use of other applications using your internet connection. Many business centres bundle internet connection services as part of their offering under the term 'Broadband Internet', in our experience however, the quality (speed, latency, availability) of such bundled solutions can vary greatly and all too often do not match even the most basic ADSL services provided by high-street ISPs. If you would like to see how the system performs using your Internet connection please ask our Sales Team for access to the demo system.
