Voyager sees Record Growth

20/07/2007

Recruitment software specialist sees client wins, staff hires and Microsoft Certification

Voyager Software, the SME recruitment agency software specialist, today announces that it has seen record growth in the business over recent weeks.

The company has won 15 new agency clients in the last six weeks, has hired eight new staff across different areas of the business and has renewed its Microsoft Certification, underlining its ability to integrate into agencies' existing IT infrastructure.

The growth comes as the company sees an ever increasing demand for its highly regarded front and back office recruitment software systems which help small to medium sized agencies search, place and manage multiple candidates with minimal time outlay.

The Online Recruitment Conference & Expo San Francisco, 18/19 September 2007

Paul Thompson, Sales Director, Voyager Software, said: "This has been a hugely exciting time for the business – we're seeing more and more clients coming on board and we're staffing up to meet the demands that this places on us. We're continuing to deliver a great technology package and our renewed Microsoft certification underlines our commitment to delivering great quality products."
