

Voyager Infinity Data Migration Packages

1. Our data migration experience

Data migration does not have to be a daunting process providing that it is handled by an experienced team who can anticipate problems and prevent them from happening.

Ikiru People's Data Analysts have a combined 30 years' experience of handling our clients most precious asset - their data - often containing years of notes, contacts, business development efforts and projects history. By following the robust, proven and GDPR compliant internal processes, clients can rest assured about the safety of their data.

Over the years, we have migrated 100s of clients onto Infinity - both large and small. This has allowed us to perfect our data migration processes from many CRMs such as **Bullhorn, Bond Adapt, RDB Pro/ProNet, Access, Firefish, Microdec Profile, Eclipse, Zoho Recruit, Red Rabbit, Influence and Evolve** to name just a few. If your current software provider is not listed above, that's not a problem. We can provide a custom conversion scope and quote for any software supplier. Data migration also works from your spreadsheets and MS Outlook contacts.

In addition, we can provide optional data cleaning services to enable you to start using Infinity with the best possible data set.

"I have worked in other medical agencies and been involved in data migrations but I have never had such a smooth and positive experience. Ikiru people have been able to manipulate data and do a like-for-like database transfer of complex data, multi sector/division which has ultimately stopped us using multiple platforms to perform our day to day tasks ..."

2. What to expect?

"From start to finish the team have been on top of things and working hard behind the scenes to make our transition from our previous CRM to Infinity as seamless as possible. The communication has been exceptionally clear throughout the process from the initial chat with Sales through to going Live this week ..."

For our migrations, we opt for a two cut data migration approach. This provides you with a trial copy of your data to review before the final cut and move to Infinity. This offers you more peace of mind before you roll out your new system. Please note, this excludes the standard migration, which are one off imports from a defined structure.

Whilst most common areas of data can be migrated, some areas do vary between systems therefore cannot be transferred. For example, templates, searches, reports and timesheets are bespoke to each system and will need to be recreated in Infinity - which we will help you with.

We never outsource this work to a third-party so you don't need to worry about the safety of your data, resulting in an unrivalled, smooth migration with increased communication and speed previously unheard of in the industry.

Please note that we require a copy of your data to provide you with an accurate data migration quotation.

3. See what some of our clients have to say:

"The Ikiru People team basically amalgamated two old databases. We had Act! which we used for our clients, and we had a separate CRM for candidates. They took both databases and brought them both onto Voyager Infinity with very little effort." – Pyramid8

"The consultancy, knowledge, implementation and the system itself – Voyager Infinity was head and shoulders above the competition." – Rayner Personnel

"The migration went as smoothly as we could have possibly hoped for. I would have honestly expected a few more hiccups, so it exceeded my expectations." – Morgan Law

"I can honestly say the migration has been superb. The project management, training and ongoing support has been exemplary, as was the data migration service." – Grist Legal

"I would like to say how impressed I've been so far with the service and product Voyager offers. Your team have made the transition painless." – Girling Jones
